

New Start with “FUJIFILM Wako Pure Chemical”

April 2, 2018

FUJIFILM Wako Pure Chemical Corporation

FUJIFILM Wako Pure Chemical Corporation (President: Shinzo Kobatake) changed to a new company name from Wako Pure Chemical Industries, Ltd. on April 1, 2018 and merged with FUJIFILM Finechemicals Co., Ltd..

The new company name “FUJIFILM Wako Pure Chemical” shows a member of the Fujifilm Group, and combines “Fujifilm” as a global brand and “Wako” which has continued to develop and manufacture high quality reagents to address research needs in cutting-edge fields. It will further strengthen existing business by accelerating global business expansion and create group synergies.

Fujifilm Finechemicals has manufactured processing organic compounds, raw / intermediate materials of pharmaceuticals in its contact manufacturing business as a member of the Fujifilm Group since 2006. Through this merger, Fujifilm Wako Pure Chemical will realize efficient operation in development, manufacturing, sales and corporate functions, and expand the Specialty Chemicals business by fusing the technologies of both companies and strengthening functions.

Fujifilm Wako Pure Chemical provides products of research reagents, cell culture media, and Clinical Diagnostic Reagents in addition to Specialty Chemicals. As a core company in the Fujifilm Group, it will accelerate business growth and enhance corporate value by addressing for social issues through developing and providing innovative products and services.
